Conventional fire control panel

FFP-2

Order-No.: FFP-2

Conventional fire panel 2 Zones

Compact microprocessor controlled fire control panel for the use with conventional fire detection system components.

• Clear display and easy operation with LED displays and operation keys
• Connection possibility for 2 conventional zones for the use with conventional fire detection components with up to 20 detectors per zone
• Integrated power supply accord. to EN 54-4:1997/A2:2006 with 1 output for external devices rated at 24 V DC
• 2 monitored outputs with 300 mA each for signalling devices
• 2 potential free relay outputs for alarm and fault
• Emergency power supply via 1 battery 12 V / up to 7 Ah
• Independent connection of detector and signalling device zones
• Integrated "one-man-revision mode"
• 2 access levels via key switch
• Manual control of signalling devices via separate input
• Internal self test for 8 potential faults

Technical data:
Supply voltage: 230 V AC ±10 %
Power supply: 24 V DC/300 mA
Emergency supply: 1 x 12 V/7 Ah
Display: 21 LEDs for status display, thereof 11 LEDs masked
6 keys for operation
Outputs: 2 x 24 V/300 mA monitored for signalling devices
2 relay outputs 60 V DC/120 V AC /3A for alarm and fault
Colour : Grey (similar to RAL 7035)
Material : ABS
Dimensions (H x W x D) : 288 mm x 340 mm x 98 mm
Standards: EN 54-2:1997/A1:2006, EN 54-4:1997/A2:2006

Fire Alarm System
