

Fire alarm control panel MCU316

GC

Order-No.: GC

Ground circuit

To plug into the MCU316 fire control panel for monitoring of the galvanic separation between ground potential and all secondary voltages, fire zones, monitoring outputs.

Technical specification:

operation voltage: 18 up to 30 V DC

quiescent current: approx. 7 mA

alarm current : max. 2 x 140 mA

interfaces : 2 x RS-232

output open collector:

- fault output voltage: max. 29 V
- fault output current: max. 0,1A
