

Wireless Detection

SRC 3000 HM

Order-No.: SRC 3000 HM

Radio manual call point

Rradio push-button detector with integrated radio module for manual triggering of fire alarm at the fire control panel RCP 6

- working area in frequency band 433 MHz
- hooter for the acoustic signalling of alarm and fault
- acoustic signalling of other detectors' alarms and faults (function of the push-button detector can be switched on / off optionally)
- Signalling alarm: LED red, sounder (continuous tone)/signalling fault: LED yellow, sounder (interval tone every 45 sec.)
- acoustic low battery warning for 30 days
- life signs are sent regularly in order to keep up the control function of the radio distance
- Technical specification:
 - operating voltage: 6 Vdc
 - quiescent current: 45 μ A
 - alarm current: 50 mA
 - volume: 101 dB
 - operating temperature: -10° to +55° C
 - Storage temperature: -20°C up to +60°C
 - material: ABS
 - dimensions: (HxWxD) mm: 120 mm x 120 mm x 31 mm
