Explosion proof

X 2200

Order-No.: X 2200

Ultraviolet Flame Detector

ultraviolet flame detector to ensure the detection of non-hydrocarbon fires in industrial application such as turbines, hydrogen, ammunition, silane.

Same features as X 9800 with the following differences:
• detects a n-heptane fire of 0.1 m² size at a distance of up to 18 meters
• Technical specification:
   supply current: 104µA quiescent /253mA alarm
   sensitivity N-Heptan: 0.1 m² at 18m distance, 1 sec. Methan: 30" flame at 21m distance, 1 sec.

Fire Alarm System
